The **Sanskriti School Quiz Club** invites students of classes 9-12 to participate in the UL **National Safety Science Quiz 2017**. The National Safety Science Quiz (NSSQ) is promoted by UL, a premier global safety science company. As a leader in the testing, inspection and certification industry, for over 124 years UL has been driven by the noble mission to promote safe living environments for all. UL constantly strives to advance standards research and development, safety education and outreach by partnering with a diverse set of stakeholders ranging from the government, manufacturers, regulatory authorities, academia, corporations and nonprofit institutions.

Through its not-for-profit mission, UL has charted upon an ambitious plan to groom the next generation of Indians to become more safety conscious than their predecessors and permeate this awareness of safety science in every sphere of life. In line with its 'In India for India' philosophy, UL's efforts in the country towards building a safer India is anchored firmly on engaging with academia and the vast student population.

Designed for **students from class 9 to 12**, the National Science Safety Quiz is a strategic initiative that seeks to enlighten students about this simple fact– safety is a science. The quiz encourages high school students to look at and understand the everyday public safety challenges around them- be it **Road Safety, Electrical / Fire hazards/Cyber Safety** or others- and mediate on solutions. NSSQ is not merely a quiz competition – in order to mobilise learning into action, every year, the quiz culminates in a '**Safety Parliament**', where the finalists of the quiz table motions about public safety in a mock parliament presided by panellists, known for their expertise and contribution to safety science. Thus, for its young participants, NSSQ is the starting step in a lifelong journey to comprehend the science of safety, but also become safety ambassadors.

Since its launch in 2014, NSSQ has been growing at a phenomenal pace, adding more students and covering more cities each year. For the second year in a row, UL has partnered with NDTV to widen the reach of this unique endeavour. Last year, the Quiz, themed 'Safety in Everyday Life,' garnered massive response with entries from 5500 students (from 280 schools across the

country) of which 20 students (from schools across the five major metros) were part of the finale which was telecast on NDTV.
