Dear Sir/Ma'am,

This December you have a chance to witness something extraordinary. It comes along only once a year so we'd urge you to change your plans and book your date with #CelebrateAvishkaar, Asia's Biggest Celebration of Science & Robotics.

Visit Thyagaraj Stadium on **Saturday & Sunday, 14-15th December 2019** and be a part of the spectacle where the national finales of two nationwide events, IRC League & Avishkaar Makeathon along with a host of fun & engaging workshops will be held. Last year's event was attended by 10000+ visitors including students, parents, and dignitaries from top Delhi-NCR & Gurugram schools and we hope to see a bigger crowd this time around.

You'd be pleased to hear that we're organizing Maker Workshops on various skills like 3D Printing, Aeromodelling, Electronics, Coffee Painting, Light it Up, String Art, Robotics, AR & VR. This is a great opportunity for young, passionate kids to discover new activities. You never know they might just find their future calling here! I would like to give you the opportunity and allow your teachers and students to avail of these workshops **for FREE**. Participation Certificates will also be given to each participant who attends these workshops.

Don't miss this amazing opportunity!

Interested Students to contact Ms. Anuja Mittal, HOD of Computer Department by 11th December.
